Interview Questions:-

---

1. Child Device Usage

How does your child spend time on their smart device?
كيف يقضي طفلك وقته على الجهاز الذكي؟

- Playing games, watching cartoons.
- Playing games,watching cartoons.
- I won't let him have a smart phone as a child.
- Doesn't spend his time on a smart phone.
- Playing games, watching cartoons, Youtube and listening to songs.
- He enjoys coloring apps and games with sounds and animals.
- Downloading games and playing them, and sometimes watching videos on YouTube.
- Playing on the device.

At what times during the day does your child usually use apps?
في أي أوقات من اليوم يستخدم طفلك التطبيقات عادةً؟

- Free time, 12-2 pm after breakfast , 6-10pm before bed.
- After lunch for 2 hours, maximum 2 hours.
- There is no specific time.
- After making what he has been told to do as a gift.
- After he comes back from kindergarten.
- 2 hours on weekends.
- While eating.
- After lunch.

2. Learning Sources & Current Tools

Where does your child usually learn from?

(School, YouTube, apps, books, etc.)

من أين يتعلم طفلك عادةً؟

(المدرسة، يوتيوب، التطبيقات، الكتب، إلخ)

- School.
- Nursery, nursery books, songs,shape.
- School, Books.
- Youtube (Ms Rachel).
- Books, school, online language learning apps (Duolingo).
- He learns by spending time with relatives who are slightly older than him, interacting and playing with them, which helps him learn new things. He also learns from watching kids' videos on YouTube.
- From kindergarten.
- School.

What makes you like the educational apps your child uses?

ما الذي يجعلك تفضل التطبيقات التعليمية التي يستخدمها طفلك؟

- To see that he is already learning something helpful and new.
- To spend his free time using it instead of wasting his time.
- To be simple, safe, colorful, and include educational games, especially if they don't have annoying ads.

- Because they focus on content that is useful for children and age-appropriate, without any external or unsafe content.
- Educational apps that are fun so he can learn while enjoying them.
- Apps that include useful things that children can truly learn from.
- I prefer apps that have attractive colors and illustrations that make the child excited to learn.
- Apps that give the child an interactive experience, like tapping or dragging objects.

Can you describe the last time your child used an educational app?
هل يمكنك وصف آخر مرة استخدم فيها طفلك تطبيقًا تعليميًا؟

- He was revising Quran and he found it helpful.
- He engages with the educational songs he has memorized and starts singing along and interacting with them enthusiastically.
- He was playing with an animal learning app. He would tap on the animal, and the app would play the animal's sound. He was very excited and happy, and he started imitating the animal sound and saying its name.
- He was learning colors. He had to choose the correct color for the picture, and he was happy when he got it right.
- After my child used the app, I sat with him and we talked about what he saw in it, such as numbers, colors, and animals.

---

3. Educational Goals

What skills would you like your child to learn before starting school?
ما المهارات التي تود أن يتعلمها طفلك قبل بدء المدرسة؟

- English language.
- English Language.
- Swimming.
- Language, booty training.
- Language, drawing, self defense.
- Learn letters, numbers,colors and develop focus.
- Learn drawing and coloring because he enjoys these activities a lot.
- Learn social skills and how to interact with others.

How do you know if your child has improved?
كيف تعرف أن طفلك قد تحسّن؟

- School grades, way of thinking.
- Put them in a situation and they know what to do, having been in a fight but knowing the right thing to do, way of thinking, behavior and better communication.
- When he had the ability to come up with ideas to improve his life.
- When I found out that he learns faster.
- When I found him speaking new words that I didn't learn from him.
- When I notice that he remembers letters or numbers by himself and when he tries to read a simple word or answers questions correctly.
- When he starts remembering things he learned and tells me about them or uses them in daily life.
- When he starts understanding things and interacting better.

What is the most difficult thing you face when helping your child learn at home?
ما أصعب شيء تواجهه عند مساعدة طفلك على التعلم في المنزل؟

- Simplifying the fact so they could easily understand it, having to understand the explanation of a hard english topic.
- To fully understand and connect the fact or the thing they took with real life.
- To make him concentrate on the learning materials.
- To find out that I don't have time for any other activity.
- He just wants to play, so it’s hard to keep him learning for a longer time.
- He loses focus quickly.
- He forgets quickly, so I try to help him by repeating the information.
- He doesn't understand things quickly.

---

4. Engagement & Motivation

What type of content keeps your child engaged the longest?
ما نوع المحتوى الذي يبقى طفلك متفاعلًا لأطول وقت؟

- Cartoons.
- Cartoons.
- Games.
- Youtube kids.
- Songs, games.
- Educational songs.
- Watching Spider-Man
- Games.

When does your child lose interest during learning?

متى يفقد طفلك اهتمامه أثناء التعلم؟

- Too much pressure.
- When they feel that a thing turned from skill or entertainment to homework.
- When he spent too much time without any breaks.
- When it gets more difficult.
- He loses interest during learning when an activity or task is repeated too often and becomes boring for him.
- When it takes too much time.
- He loses interest when he feels bored or when the activity takes too long.
- When he gets tired or bored.
-

What makes your child continue using an app for a long time?

ما الذي يجعل طفلك يستمر في استخدام تطبيق لفترة طويلة؟

- Cartoon and fast paced stuff.
- Races, gang stuff and gta, fifa, roblox.
- if he is interested in and enjoys its content, and likes interacting with the games or activities it offers.
- When the app is fun.
- If the app has different levels and games, and gives rewards like stars or encouraging sounds.
- when he wants to avoid doing something else.
- If the app is entertaining for him.
- When he finds the app entertaining and likes it.

Why might your child stop using an educational app?
لماذا قد يتوقف طفلك عن استخدام تطبيق تعليمي؟

- If the content is repeated or if it was dull.
- If the app becomes too difficult, or if it does not offer new things.
- When he gets bored.
- When the content is repeated.
- He may stop using it if he doesn't find it fun or if he finds another game he prefers more.
- If it is boring.
- If the app is too repetitive and doesn't offer anything new.
- If he finds another game that is more fun.

Do you prefer your child to learn through games, videos, or interactive activities?
هل تفضل أن يتعلم طفلك من خلال الألعاب أم الفيديوهات أم الأنشطة التفاعلية؟

- Videos,games,activities.
- Interactive activities,videos,games.
- All the options would be great, variety is important.
- Games and interactive activities because children learn better when they participate themselves.
- Interactive activities.
- I prefer my child to learn from all possible sources such as games, videos, and interactive activities so he can gain different experiences and learn in various ways.
- Interactive activities
- Interactive activities.

How do you encourage your child to do something they don’t like to do?
كيف تشجع طفلك على القيام بشيء لا يرغب في فعله؟

- Change the way they comprehend or take the facts.
- Forcefully make them do it.
- Giving him motivations like gifts .
- Turn the activity into a game.
- Encourage him with positive words, and sometimes I give him a small reward.
- I try to do the activity in front of him first so he can see me and imitate me. Usually, when he sees me doing it, he becomes motivated and tries to do the same.
- I encourage him by promising a reward if he does the task.
- I try to motivate him or promise to get him something he likes if he finishes the task.

How involved are you when your child uses educational apps?
إلى أي مدى تشارك طفلك عندما يستخدم التطبيقات التعليمية؟

- I would try to be involved as much as I can because every platform need to be supervised.
- I sat with him at the beginning to help him understand the activity, then I let him continue by himself.
- I only supervise him and don't participate directly.
- I joined him for a short time at the beginning, then I let him use the app on his own while I checked on him from time to time.
- Most of the time I just supervise him while he uses the app and help him if he needs it.

- I participate with him about 50% of the time.

---

5. Features & Expectations

What features do you think are missing from the apps you currently use?
ما الميزات التي تعتقد أنها مفقودة في التطبيقات التي تستخدمها حاليًا؟

- If there are any quizzes, the result will be sent to my phone.
- Educational apps should be free of ads because ads distract the child and affect their focus while learning.
- Parents report showing the child's progress.
- I prefer the apps to be free of ads so they do not distract the child while using them.
- I think an important missing feature is that apps should respect the user and provide mindful and appropriate content.
- I wish apps would provide content that teaches children basic values in a simple and age-appropriate way.
- Provide safe, mindful content.

Insights

1. Entertainment drives usage, not learning

Children primarily use devices for **games, cartoons, and videos**, not education.
Learning apps must **compete with entertainment**, not behave like school.

---

2. Learning must feel like play (not obligation)

Kids quickly disengage when:

- it feels like homework
- it's too long or repetitive
- it becomes difficult

Insight:
The app must **hide learning inside fun experiences** (gamification is not optional).

---

3. Short attention span + high drop-off risk

- Kids lose focus quickly
- Get bored with repetition
- Need breaks

Insight:
Design for:

- **short sessions**
- **variety**
- **constant stimulation**

---

4. Interactivity > passive content

Children engage more when they:

- tap, drag, interact
- imitate sounds
- participate actively

Insight:
Passive content (videos only) is not enough → **interaction is key to learning**

---

5. Rewards and progression strongly motivate usage

- Stars, sounds, levels keep kids engaged
- Parents also use rewards externally

Insight:
Built-in **reward systems + progression loops** are critical for retention.

---

6. Repetition without variation causes abandonment

- Repetitive content = boredom
- No new content = app abandonment

Insight:
Apps must provide:

- **variety**
- **progressive difficulty**
- **new content over time**

---

7. Parents want control, safety, and trust

- Strong demand for: no ads, safe content, age-appropriate material
- Some parents restrict device usage entirely

Insight:
Trust features are essential:

- **ad-free experience**
- **safe curated content**
- **parent control**

---

8. Parents are partially involved, not fully engaged

- Most supervise but don’t actively participate
- Some help only at the beginning

Insight:
App must be:

- **self-explanatory for children**
- but still allow **light parent involvement**

---

9. Parents struggle with teaching at home

- Difficulty simplifying concepts
- Lack of time
- Kids resist learning

Insight:
The app should act as a:
“digital teacher” that reduces parent effort

---

10. Learning is measured by real-life behavior

Parents value:

- better communication
- applying knowledge in real life
- independent thinking

Insight:
Success ≠ scores only
→ Show **real-world skill development**

---

11. English learning is a high-priority goal

Repeated across multiple parents.

Insight:
Strong opportunity to focus on:

- **early English learning (core feature)**

---

12. Children are driven by variety and novelty

- Switch apps when bored
- Download new games frequently

Insight:
Retention depends on:

- **constant novelty**
- **multiple activity types**
