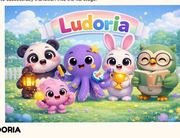
UX Case Study
Ludoria

An interactive educational program that helps children develop basic skills and confidence to successfully transition into the KG stage.



ABOUT **LUDORIA**

An interactive educational application designed to help children prepare for the KG stage through engaging and age-appropriate learning experiences. The application offers a variety of features including learning modules for alphabet and numbers, educational games, puzzles, stories, and creative activities such as coloring.
It also includes progress tracking, levels, and performance insights to support continuous development and keep children motivated. The platform is designed to enhance cognitive, social, and problem-solving skills while providing a fun and intuitive experience for both children and parents.

PROBLEM STATEMENT

Mothers struggle to find a safe, engaging, and structured way to prepare their children for the KG stage, as many apps are either not educational enough or not suitable for young children.

GOALS

Help children develop basic skills in a fun and interactive way
Support parents in guiding their child's learning
Provide a safe and easy-to-use experience
Track children's progress and improve engagement

WHAT MAKES **LUDORIA** SPECIAL

- A FUN ADVENTURE DESIGNED LIKE A VIDEO GAME FOR GREATER INTERACTIVE
- PLAN AND CREATE GAMES THAT MAKE LEARNING IN ALL WAYS
- SAFE, CHILD-FRIENDLY CONTENT
- ENGAGING LESSONS THAT KEEP CHILDREN FOCUSED AND WELL-ENJOY

Empathy Map

Says

"I want my child to be ready for the school interview."

"I want a simple and fun way for my child to learn."

"I don't know where to find reliable learning the basics."

"I want my child to feel confident before starting school."

Thinks

"Is my child behind compared to other children?"

"I wish there was a simple, fun, structured learning plan."

"I need to help my child build strong basic skills early."

"Learning should be fun and memorable."

Does

Watches educational videos for kids online.

Searches for educational apps and programs.

Tries to teach letters and numbers at home.

Uses simple games to support learning.

Feels

Anxious about her child not being ready for school.

Confused due to too many options and unclear choices.

Responsible for her child's future.

Hopeful about improving her child's skills.

USER PERSONA

NAJMNEET

Name
Reham Hassan

Age
34

Gender
Female

Location
Cairo, Egypt

Job
Teacher

Background

Reham is a working mother who tries to balance between her job and taking care of her child's education. She wants her child to learn basic reading and writing skills in English, but she sometimes struggles to explain things in a simple way. She gives her child the phone mostly after lunch or before bed, so she prefers apps that are useful, safe, and not just for entertainment.

Quote

"I want my child to learn and enjoy at the same time. I don't want him to feel like it's school again."

PERSONAL

Characteristics

- 34 years old working mother
- Teacher by profession
- Goes for child the latter during free time
- Very curious for child's education and future
- Prefers safe and easy-to-use educational apps

Hobbies and Interests

- Watching parenting videos
- Looking for educational content for kids
- Spending time with her child
- Stories, songs, and cartoons with her child

GOALS

Primary goals

- Her child learns English and basic skills
- Prepare her child for school interviews and school life
- Improve child's thinking, memory, and focus
- Make learning fun, not like homework

Motivations

- She wants her child to be ready for school life
- She wants to feel that screen time is useful, not wasted
- She wants to see her child's progress
- She wants to see clear progress reports

CHALLENGES

Main pain points

- She doesn't know how to simplify information for her child
- Her child gets bored quickly
- Many apps feel like homework
- Some apps are difficult for children to use

Frustrations

- Too many ads
- Content not suitable for child's age
- Spending screen time without benefit
- Apps not safe or not trusted

USER JOURNEY **MAP**

	Discover	Install	Onboarding	Explore	Learn	Reward
Action	Parent finds the app on App Store.	Downloads and opens the app.	Creates account selects child age	Child browses lessons/games	Starts lessons/ plays educational games	Earns points, badges, stars.
Emotion	🤔	😊	😐	😕	😍	🤩
Problems	Too many similar apps	Slow loading / heavy app	Too many steps / long forms	Confusing layout / too much text	Repetition → boredom	Rewards not exciting
Opportunity	Clear branding strong visuals	Fast performance / smooth start	Quick onboarding (1-2 steps only)	Simple UI / visual icons	Gamification → levels + variety	Fun rewards (animations, avatars, sounds)
